

Drilling Templates

Our laser cut 2mm thick galvanized steel drilling templates greatly reduce the installation time and provide a much more accurate installation.

Our latest design interlock with each other using 4 accurately cut holes locating on 4 stubs meaning there is virtually no movement once they are placed together.

PG127 Drilling Templates

SG127/OP/400 is a drilling template for a PG127 cabinet. We recommend at least 2 in order to create a left and right hand single group. For multiple lanes we recommend 1 template for each cabinet.

SG127/OP/401 is a pair of drilling templates to space the cabinet templates in order to create accurate walkway width. Our standard template create 600 and 900mm walkway width.
