# PEDESTRIAN ENTRANCE CONTROL

QR Code Equipment Registration

QR Code Equipment Registration

Installation, planned and reactive service MUST only be preformed out by manufacturer trained technicians.

Product warranty provides peace of mind and ensure that, in the event of a breakdown, we will provide all parts free of charge.

For your warranty to be valid it must be:-

- Registered with us via the QR registration system, within 30 days of installation.
- Installed by manufacturer or distributor trained personnel.
- Installers need to supply a copy of the Site Acceptance and Commissioning Test (SCAT) checklist.
- Serviced and maintained must be preformed by manufacturer or distributor trained personnel and recorded via the QR registration system.
- Maintained to manufacturer specification and intervals.

As part of the final stage of installation the qualified technician MUST scan the QR code for each cabinet installed, fill out the warranty registration form and submit it.

This form is required to prove that the equipment has been installed by a qualified technician and the start date of the warranty. If the form is not filled out than:-

- Warranty will begin from the date of despatch from Evolves warehouse.
- It will be assumed that the equipment has not be installed by a qualified technician.

Failure to follow the above for planned and reactive service will also deem the warranty to be invalid.
